January 31, 2018

Dear Arkansas Dealer/Distributor:

The Arkansas State Plant Board (ASPB) has adopted a new regulation on pesticides that contain the active ingredient Dicamba.

Under the new regulation, applications of products containing ANY formulation of dicamba, registered with the ASPB, are allowed through April 15th.

The regulation applies to the use of dicamba, not the sale. However, record keeping, licensing, and training requirements as identified by the federal label and state regulations are in effect. Please refer to the product label and the attached regulations for these requirements.

From April 16th through October 31st of each year, applications of products labeled for agricultural use that contain dicamba are prohibited with the following exemptions:

Applications of products containing dicamba made to pastures or rangeland are allowed provided the application site is no closer than 1 mile in all directions from sensitive areas and non-target susceptible crops as identified by the product label.

Applications of products containing dicamba for turf, ornamental, direct injection for forestry activities and home use are allowed.

Attached is a copy of Arkansas Regulations on Pesticide Classification. The rule can be found on pages 16-18, Section XII Class H, and on the Plant Board’s web page, Dicamba Updates. [http://www.aad.arkansas.gov/arkansas-dicamba-information-updates](http://www.aad.arkansas.gov/arkansas-dicamba-information-updates)

The rule will take effect February 1, 2018.

If you have any questions or need additional information please contact the Pesticide Division.

Sincerely,

Susie Nichols
Division Manager
